

Comprehensive Dentistry and the Dental Team

Your team already possesses the skills to transform your practice... but are they empowered? How can you motivate them to share your vision and put forth the effort to bring your goals to life?

Bring your entire team to this course and discover together the joy of a quality-driven practice! Learn concepts and techniques for implementing new technology into everyday dentistry to diagnose and deliver exceptional comprehensive care. You and your team will return from this course with the tools and inspiration to establish a philosophy of excellence at every level and build a successful practice that will continue to prosper, even in challenging economic times.

We will uncover the art of comprehensive restorative dentistry: from examination and diagnosis to tooth preparation, tissue management, temporization, and final restoration. Drawing upon Dr. Jeseck's four decades of experience building and maintaining a successful practice, attendees learn how to better understand themselves, their teammates, and their patients. A happy team is a productive and profitable one! Attend this course together and transfer the excitement and the learning back to the office on Monday morning.

Learning Objectives:

- Grow your practice – do more dentistry in less time... *with less stress!*
- Motivate patients to accept comprehensive dentistry and know when they are ready to begin treatment.
- Obtain more predictable restorative and cosmetic case results.
- Overcome patients' financial concerns.
- Discover the power of 3D intraoral scanning for patient education and treatment acceptance of restorative dentistry and orthodontic aligners.
- Explore the vast and rapidly changing world of CAD/CAM dentistry and 3D printing.
- Recognize the importance of the morning/monthly meetings and time management.
- Discover a strategy for hiring the "right" people that fit the vision of your practice.
- Gain insight into building and retaining a strong, fulfilled, happy team with improved communication and understanding.
- Pinpoint how to improve listening skills and nurture lasting, trusting relationships with your patients.

SUGGESTED FORMATS: Partial or Full Day; Lecture, Workshop, Keynote

SUGGESTED ATTENDEES: Dentist and Team
