

# Warren Jeseq, DDS, MAGD, MAES

Master of the Academy of General Dentistry

## SPEAKER PACKET

*"May excellence be your goal and happiness your continual companion."*

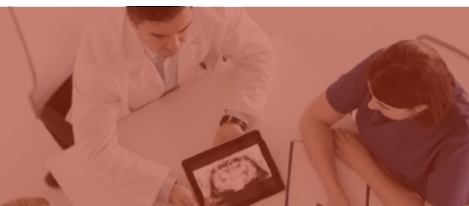

# A Systematic Method to Deliver Excellence with Consistency

**Combining a tried-and-true, common sense outlook with an infectious passion for optimum dentistry, Dr. Warren Jesek will excite, motivate and inspire—as well as challenge—dentists to a higher level of excellence.**

## Definitive Diagnosis and Treatment of TMD

If you've ever felt the frustration of unpredictable results in splint therapy, you're not alone. Learn the dentist's role in diagnosis and treatment of TMJ conditions as they relate to occlusion.

## Comprehensive Dentistry and the Dental Team

Your team already possesses the skills to transform your practice... but are they empowered? Bring your team to this course and motivate them to share your vision and put forth the effort to bring your goals to life.

## Achieving Excellence in Restorative Dentistry

Escape from single-tooth, emergency-driven dentistry and help patients understand the true value of dental health. Dr. Jesek takes the guesswork out of restorative cases to help you achieve maximum impact in your everyday dental practice.

## Sleep, TMD, and Technology in Today's Dental Practice

The identification of sleep and oral facial pain will be demonstrated and the uses of comprehensive examination, intraoral scanning, 3D printing and CBCT will be highlighted.

*"The best part of the course was seeing long term prognosis of real world cases, new technology, the energetic speaker, great visuals and solid technique tips."*

# Definitive Diagnosis and Treatment of TMD

**If you've ever felt the frustration of unpredictable results in splint therapy, you're not alone. Join Dr. Jesek for this eye-opening course as we zero in on the dentist's role in diagnosis and treatment of TMJ conditions as they relate to occlusion.**

Dr. Jesek illuminates concepts and techniques regarding non-directive splint design, delivery, adjustment and clarification of the principles of occlusion and equilibration of the natural dentition and restorations. As an alumnus of both Pankey and Dawson Institutes, Past-President of the American Equilibration Society, and drawing upon his 40 years' experience in treating complex restorative cases, Dr. Jesek is uniquely qualified to help you improve the diagnosis and treatment of occlusomuscle/TMJ disorders within your practice.

Hands-on Workshops are available upon request and are designed to fit your needs. Participants will learn delivery and adjustment protocols that will enhance the effectiveness of conservative TMD treatment.

## Learning Objectives:

- Review TMJ anatomy and muscles of mastication function.
- Understand how to use bimanual guidance to determine temporomandibular joint health.
- Explore the diagnostic benefit of palpation of the muscles of mastication.
- Recognize the role of occlusomuscle disorders in TMD.
- Illuminate the dentist's role in successful rehabilitation of the temporomandibular joint.
- Recognize when occlusal treatment will work predictably.
- Identify how precision occlusal appliances make restorative dentistry easier.
- Explore the use of TMJ imaging, panoramic, CT, CBCT, and MRI.
- Review how to use emergency appliances to eliminate acute occlusomuscle pain.
- Discover how to eliminate the need for excessive adjustment of crowns at delivery.

**SUGGESTED FORMATS:** Partial or Full Day; Lecture, Workshop, Keynote

**SUGGESTED ATTENDEES:** Dentist and Team

# Comprehensive Dentistry and the Dental Team

**Your team already possesses the skills to transform your practice... but are they empowered? How can you motivate them to share your vision and put forth the effort to bring your goals to life?**

Bring your entire team to this course and discover together the joy of a quality-driven practice! Learn concepts and techniques for implementing new technology into everyday dentistry to diagnose and deliver exceptional comprehensive care. You and your team will return from this course with the tools and inspiration to establish a philosophy of excellence at every level and build a successful practice that will continue to prosper, even in challenging economic times.

We will uncover the art of comprehensive restorative dentistry: from examination and diagnosis to tooth preparation, tissue management, temporization, and final restoration. Drawing upon Dr. Jesek's four decades of experience building and maintaining a successful practice, attendees learn how to better understand themselves, their teammates, and their patients. A happy team is a productive and profitable one! Attend this course together and transfer the excitement and the learning back to the office on Monday morning.

## Learning Objectives:

- Grow your practice – do more dentistry in less time... *with less stress!*
- Motivate patients to accept comprehensive dentistry and know when they are ready to begin treatment.
- Obtain more predictable restorative and cosmetic case results.
- Overcome patients' financial concerns.
- Discover the power of 3D intraoral scanning for patient education and treatment acceptance of restorative dentistry and orthodontic aligners.
- Explore the vast and rapidly changing world of CAD/CAM dentistry and 3D printing.
- Recognize the importance of the morning/monthly meetings and time management.
- Discover a strategy for hiring the "right" people that fit the vision of your practice.
- Gain insight into building and retaining a strong, fulfilled, happy team with improved communication and understanding.
- Pinpoint how to improve listening skills and nurture lasting, trusting relationships with your patients.

**SUGGESTED FORMATS:** Partial or Full Day; Lecture, Workshop, Keynote

# Achieving Excellence in Restorative Dentistry through Creative Treatment Planning

**Are you ready to take the guesswork out of your restorative cases and achieve maximum impact in your everyday dental practice?**

Understand the art of comprehensive restorative dentistry: from examination and diagnosis to tooth preparation, tissue management, temporization, and final restoration. This program will provide time-proven and scientifically-based techniques for implementing the latest technologies into your practice. Discover the power of digital diagnostic tools and a process for identifying patient needs and guiding them to optimum dentistry through the comprehensive co-discovery examination process.

The pursuit of excellence in any field is a process of learning and overcoming challenges. Dr. Jesek has done just that for more than four decades building and maintaining a successful practice. Join Dr. Jesek and explore time-proven principles that have a common thread of excellence at every level.

## Learning Objectives:

- Learn how to plan treatment and present comprehensive cases to gain greater case acceptance.
- Discover a process for overcoming the patient's financial concerns.
- Analyze strategies for escaping single-tooth, emergency-driven dentistry.
- Learn how to guide the money- or emergency-driven patient to accept comprehensive oral care.
- Discover the power of 3D intraoral scanning for patient education and treatment acceptance of restorative dentistry and orthodontic aligners.
- Review the use of CBCT for implant planning and guided placement.
- Pinpoint how to select the appropriate CAD/CAM technology to produce outstanding, functional and esthetic results.
- Understand the process for designing occlusions that are kind to porcelain.
- Eliminate the stress of taking impressions.
- Ensure that your restorations are in harmony with the TMJ's and comfortable to the patient.
- Explore how patient education elevates the value of quality oral care motivating patients to refer family and friends.

# Sleep, TMD, and Technology in Today's Dental Practice

**The landscape of dental examination and treatment is changing rapidly with advancements in technology.**

It is becoming more important for dentists to screen for sleep apnea. Making intraoral appliances for sleep apnea can seem to be overwhelming but can be overcome with training. Dentists can provide these oral appliances working with their sleep physicians. This service is very rewarding to our patients that cannot wear the CPAP.

Many of our patients suffer from oral facial pain and are seeking relief that can only be provided by dentists. Proper screening will identify these patients and you can treat or refer them. Many of these patients have been told that there is nothing that can be done but with the proper knowledge we can treat or refer them.

The identification of sleep and oral facial pain will be demonstrated and the uses of comprehensive examination, intraoral scanning, 3D printing and CBCT will be highlighted.

## Learning Objectives:

- Identify signs and symptoms of sleep disordered breathing and occlusomuscle disorders
- Understand dental treatment and referral options for sleep apnea and occlusomuscle pain
- Review the use of CBCT and intraoral 3D scanning to discover dental conditions and educate patients about their diagnosis and treatment options
- Learn to use open ended questions to discover underlying dental and medical issues that affect the patient's overall health
- Recognize the value of open conversations to educate patients about the benefits of early diagnosis and preventive measures that positively effect upper airway development
- Enhance listening skills to identify patient symptoms and strengthen team communication for unified patient care.
- Create a workspace where teamwork thrives, laughter is welcomed, and everyone leaves with a smile —patients and staff alike!

**SUGGESTED FORMATS:** Partial or Full Day; Lecture, Workshop, Keynote

# Warren Jeseq, DDS, MAGD, MAES

**Have you felt the frustration of unpredictable results from your TMJ and restorative cases? Or have struggled to empower your team? Or want to increase comprehensive case acceptance in your practice?**

Combining a tried-and-true, common sense outlook with an infectious passion for optimum dentistry, Dr. Jeseq will excite, motivate and inspire—as well as challenge—dentists to a higher level of excellence. Dr. Jeseq's core message revolves around comprehensive care for the entire family and a systematic method to deliver excellence with consistency.

Dr. Jeseq graduated with his dental degree from Loyola University Dental School. He continued his dental training at The Pankey Institute for Advanced Education and has been a teaching assistant in their TMJ dissection course. Additionally, Dr. Jeseq earned his mastership with the Academy of General Dentistry.

His articles have been published in Dentistry Today, Dental Economics, the Pankeygram, and the American Equilibration Society's Contact. He has presented at national meetings for the Academy of General Dentistry, the American Equilibration Society, the American Dental Association, the American Academy of Pain Management and Chicago Dental Society Midwinter Meeting. Seminar attendees appreciate his passionate, easy to understand approach and his teaching style, which enables deep learning and provides tools they can use when they get back to the office Monday morning.

*"After 40 years of practice, I am comfortable with the price I have paid for what I have. I have a reasonable intolerance of my position in life that keeps up a healthy tension to continue to strive to improve."*

-Dr. Warren Jeseq

## What's Being Said About Dr. Jesek's Presentations

"Your presentation was eye opening and exciting. Your level of confidence and energy is rare to find in a presenter. I especially liked how you had captured everyone's attention." **Hillarie Ryann Hudson, DMD, MSD; Program Director, Decatur District Dental Society**

"I have worked with Dr. Jesek as a speaker for the past few years. He always received excellent reviews from our attendees and we will continue to utilize him as a speaker at our conferences." **Connie Stevens; Director of Education Continuing Education, Inc./University at Sea**

"Dr. Jesek has taken many hours of instruction and has co-taught in head and neck anatomy with me. I consider him very competent in his knowledge of head and neck anatomy applied to dentistry." **Parker E. Mahan, DDS, PhD**

"I am writing this in sincerest honor and gratitude to have known Dr. Jesek and to have worked closely with him. I wish to express my highest admiration for his knowledge and enthusiasm to help our fellow professionals. I wish him the highest success in his seminars, for his unselfishness in sharing with all of us." **Peter A. Neff, DDS, ScD, Dr PH**

"The lectures presented by Dr. Jesek are great! He is a fun, energetic and passionate person. Anyone wanting a better understanding of occlusion and TMD will love his lectures. The quality of my dentistry has benefited from the knowledge about occlusion and TMD that Dr. Jesek taught me." **Christian R. Strohmeyer, DDS**

"Dr. Jesek is a very gifted, charismatic and entertaining teacher. With an emphasis on quality dentistry, principles of occlusion and diagnosis and treatment of temporomandibular disorders, my practice has been greatly enhanced. Dr. Jesek has helped me to better help my patients." **Alan Kossman, DDS**
